MEMORANDUM FOR: Chief, Overt Branch

SUBJECT : Recommendation for Curtailment of NPRC Military
File Review for Certain Contractor's Employee
Cases.

1. At the request of the Personnel Security Division, ID/3 has been scheduling NPRC military file reviews on all appropriate Contractor's Employee cases regardless of the dates of military service. In a great many of these cases, the periods of military service have been between 1941 and 1950.

2. On the whole, the limited information obtained from NPRC military file reviews has not had a bearing on the granting or denial of a clearance. If there is derogatory information related to an individual's military duty, it will be reflected in the appropriate military investigative files and surfaced during a DODCI Check.

3. It is recommended that NPRC military file checks for Contractor's Employee cases not be scheduled for those periods beyond 15 years from the current investigative action.
